

VARIO-Base plates

galvanised

Application

- For bracing applications
- For stiffening frame constructions
- For bracing wall hanger brackets from the wall or ceiling

Your advantages

- Quicker and easier installation on site thanks to pre-assembled components
- Wide range of bracing applications from the wall and ceiling in combination with other VARIO components
- Combinable with the MPC, MPR and MPT support channel systems
- Two versions for different applications

Features

Connecting thread	Max. recommended tensile load [N]		
	0°	45°	90°
M10	6,800	10,000	12,000
M16	10,000	9,000	13,000

Connecting thread	Hole-centre distance C [mm]	Dimensions [mm]						Part no.	Sales unit	Pack unit
