

Supporting force sleeve

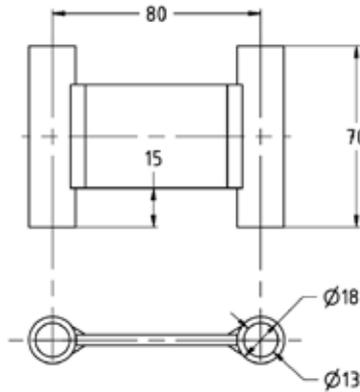

for slide guides 2.3 kN, galvanised

Application

- Reinforcement of threaded pins in applications with slide guides
- Reinforcement of threaded pins in fixed point applications
- Can be used with M10 and M12 threaded pins

Your advantages

- Perfect addition to the slide guide 2.3 kN: ensures significantly improved power transmission and stability
- Can also be combined with the 27 dB(A) anchor points
- High load-bearing capacity with compact design
- Reduction of bending stress
- No internal thread for versatile applications

Assembly instructions: Tighten the support sleeve evenly with nuts as shown in the illustration
