

DÄMMGULAST® Resilient pad

galvanised

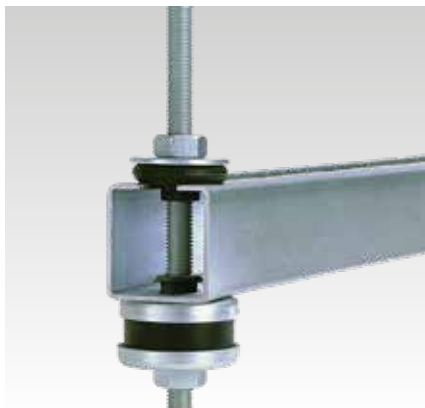

Application

- Vibration control of traverses and pipe bridges made of MPC-Support channels

Your advantages

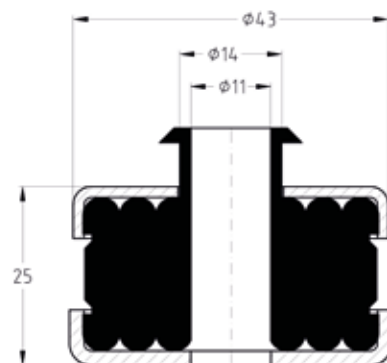

- Effective structure-borne vibration control for many installation situations
- Bushing to prevent metal contact between screws and mounted object
- Very simple installation without additional work
- Average sound level improvement of up to 17 dB(A)
- Ideal combination with DÄMMGULAST® Washers for vibration-isolated fitting of MPC-Support channels

Features

Average vibration reduction [dB(A)]	17
Max. recommended load [N]	1,000
