Safety clips

galvanised

Application

- Suitable for all attachment of pipes in residential constructions
- Ideal as support for risers or suspended pipes
- Ideal for attachment using bolt screws or shoulder screws
- Ideal for the installation of pipes in parallel when used together with twin brackets
- For indoor use

Your advantages

- Quick and efficient attachment without fastener bolts
- Safety fastening due to form-fit click-in
- Self-locking due to spring effect
- Easy to handle as the shape of the fastener is made to fit the tool
- The pipe is free to move during the installation
- Without fastener lugs - ideal where appearance is important

- The slender construction without fastening lugs allows pipes to be installed close together
- DÄMMGULAST® vibration control lining with green identification stripe: average sound level improvement up to 18 dB(A)

As support for risers

For suspended pipes

For two risers

To close: Place the screwdriver on the tool application point, hook into the latch and press the clamp to close

To open: Place the screwdriver on the tool application point, press and lift the fastener over the latch
