

MPC-Cross channel connectors

stainless steel

Application

- For cross-connections in pre-wall installations and for shelves made from MPC-Support channels

Your advantages

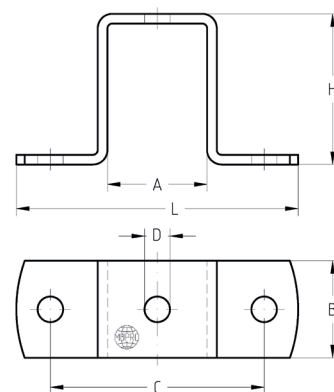

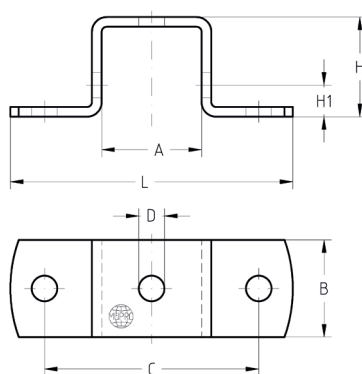

- Easy-to-install connection elements for setting up structures with the measured calculated static loads using MPC-Support channels
- Greater flexibility when setting up structures made from channels
- Multiple punching allows the section slots to be aligned in 4 directions
- For rotation-resistant attachment to building structure

For profiles 28/30 and 38/40

For profile 40/60
