

MPC-Cross channel connectors

hot-dip galvanised

Application

- For cross-connections in pre-wall installations and for shelves made from MPC-Support channels
- Suitable for outdoor use

Your advantages

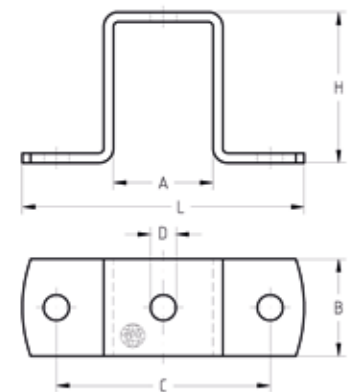

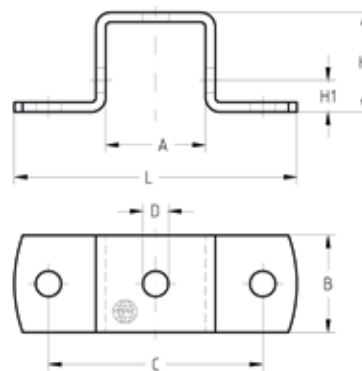

- Easy-to-install connection elements for setting up structures with the measured calculated static loads using MPC-Support channels
- Greater flexibility when setting up structures made from channels
- Multiple punching allows the profile slots to be aligned in 4 directions
- For rotation-resistant attachment to building structure

For profile 38/40

For profiles 40/60, 40/80 and 40/120

For profiles	Dimensions [mm]							Part no.	Sales unit	Pack unit
