MPR-Connection plates type S+

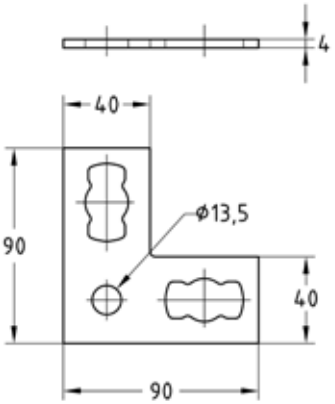
hot-dip galvanised

Application

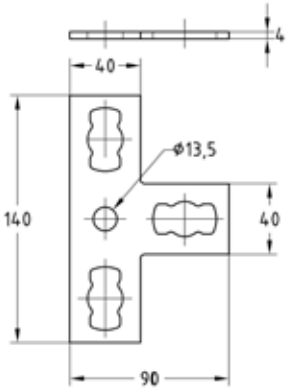
- Strong connection elements for frames and pre-wall installations using the MPR-System components
- For indoor and outdoor use

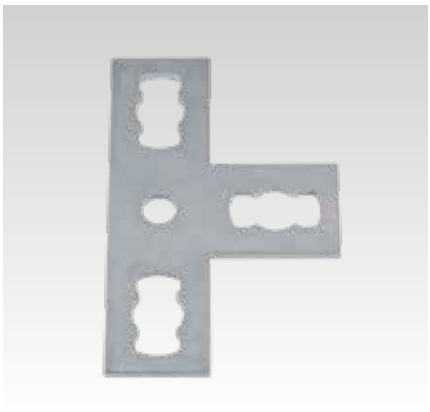
Your advantages

- Simple and quick connection of angle connections, cross connections and T-connections
- The mounting plates enable frame construction in one plane in which the channel slots have the same alignment
- Good adaptation to rail widths; in the case of frame constructions, the corners remain free
- Quick and simple attachment in combination with the MPR-Connection lock type S+

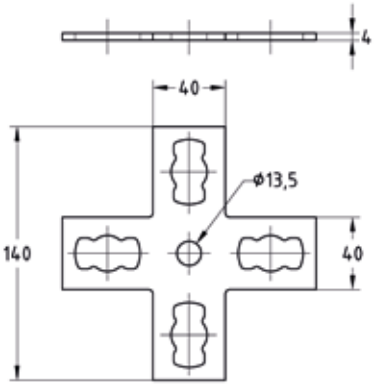


MPR-Angle plate 90° type S+





MPR-T-connection plate type S+



MPR-Cross connection plate type S+
