

Mounting angles 90° galvanised

Application

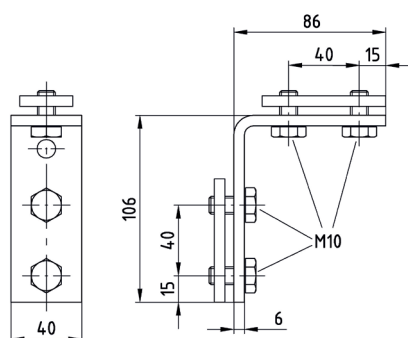

- Solid fixing element for construction of pre-wall installations and shelves as well as for channel constructions for attachments of pipelines and air ducts without welding
- Also applicable for direct mounting on walls, ceilings or floors

Your advantages

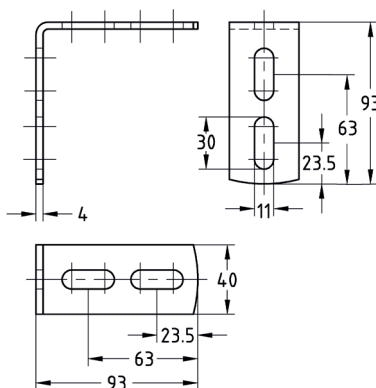

- Variable fitting possibilities
- Versatile, e.g. as: support bracket, connecting element, angle bracket
- Multi-purpose component for professional, practical installation solutions
- Can be provided already pre-assembled with MPC-Double rail nut for the quick attachment within channel slot
