

Trapezoid-sheet hanger

with clearance hole, hot-dip galvanised

Application

- For the professional attachment of installations to trapezoidal sheets

Your advantages

- Attachment using sealing rivets or self-drilling screws to the stays of the corrugations
- Easy to adapt to different trapezoidal sheet sections due to predetermined bending points

Features

Max. recommended load [N]

1,300

Type	Part no.	Sales unit	Pack unit
M10	130195	1	Pieces

- !** The specifications of the International Association for Light metal Construction IFBS must be observed for the attachment of trapezoidal sheet hangers on trapezoidal sheet metal by means of drilling screws made of cast hardened steel or blind rivets. Zinc plated drilling screws with ETA assessment can be found in the section „Ventilation“.
- In case of attachment by means of threaded rods and through-hole mounting the max. hole bearing has to be calculated.

- i** Refer to chapter „Tools“ for trapezoid-sheet pliers used for attachment.
