

Reducing couplings

Application

- For the coupling of SML pipe systems according to DIN 19522/ EN 877 with other pipe systems according to DIN 19560 (PE-HD pipes) and DIN 19535 (PP pipes) as well as for use as end caps in pipe systems

Your advantages

- The end cap can be easily removed by pulling on the tongue (with pliers, if necessary) - no cutting out of the coupling required, therefore: time and cost saving, no danger of damaging the sealing lip
- Two sealing lips guarantee stable guidance of the pipe
- A wide central fastener allows uniform tightening
- Highly elastic material with a great wall thickness guarantees a long life cycle and permanent connection
- High-stability of coupling due to the large insertion depth
- Can be used with an internal pressure of pipe up to 0.5 bar
- Tested and approved by the Material Testing Institute of North Rhine-Westphalia, supervision contract Nr. 117430
- Approved by the building authorities

Features

Nominal size DN	Pipe outer Ø [mm]	Spanner width [mm]	Part no.	Sales unit	Pack unit
50	58	7	130317	10	Pieces
70	78		130318		
80	83		130319		
100	110		130315	20	
125	135		130316	5
