European Technical Assessment

ETA-25/0296 of 28/04/2025

English translation prepared by CSTB - Original version in French language

General Part

Technical Assessment Body issuing the European Technical Assessment:

Centre Scientifique et Technique du Bâtiment (CSTB)

Trade name of the construction
product:

MÜPRO channels

Product family to which the
construction product belongs:

Products for installation systems for supporting technical building
equipment

Manufacturer:

MÜPRO Services GmbH
Borsigstrasse 14
65205 Wiesbaden
Germany

Manufacturing plants:

UBB Umformtechnik GmbH
Im Grund 1
91593 Burgbernheim
Germany

This European Technical
Assessment contains:

45 pages including 44 pages of annexes which form an
integral part of this assessment

This European Technical
Assessment is issued in
accordance with Regulation (EU)
No 305/2011, on the basis of:

European Assessment Document (EAD)
280016-00-0602 version June 2020

This version replaces:

-

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such. Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such. This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

Specific Part

1 Technical description of the product

This European Technical Assessment covers MÜPRO channels described in Table A1 through Table A5.

The MÜPRO channels MPR 41/21/1.5, MPR 41/21/2.0, MPR 41/41/2.0, MPR 41/41/2.5 and MPR 41/62/2.5 are made of thin-walled steel in C-shape. Recesses in the form of oblong and round holes allow the use of fasteners and fixtures.

The MÜPRO channels MPR 41/42/2.0 H, MPR 41/82/2.0 H, MPR 41/82/2.5 H and MPR 41/124/2.5 H consist of two profiles of equal type which are connected in the area of the back of the channels in a shape-fitting and force-fitting way. Recesses in the form of oblong and round holes allow the use of fasteners and fixtures.

The MÜPRO channels can be cut along the entire length following the manufacturers instructions without compromising the declared performances.

The drawings, dimensions and materials of the MÜPRO installation channels are given in Annex A.

2 Specification of the intended use

The performances given in clause 3 are only valid if MÜPRO channels are in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed working life of the MÜPRO channels of 50 years when installed in the works (provided that the installation systems products are subject to appropriate installation). The indications given on the working life cannot be interpreted as a guarantee given by the producer or Technical Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

In accordance with the European Assessment Document EAD 280016-00-0602, the product is intended to be used in:

- a) installations for the support of sprinkler kits,
- b) installations for the support of technical building equipment in general,
- c) installations for the support of pipes for the transportation of water not intended for human consumption,
- d) installations for the support of pipes for the transport of gas/fuel intended for the supply of building heating / cooling systems.

3 Performance of the product and references to the methods used for its assessment

3.1 Safety in case of fire (BWR 2)

No.	Essential characteristic	Performance
1	Reaction to fire	Class A1
2	Pull-through resistance of channel back holes under fire exposure	No Performance Assessed
3	Bending characteristics under fire exposure	No Performance Assessed

3.2 Safety and accessibility in use (BWR 4)

No.	Essential characteristic	Performance
4	Shape	See Annex A
5	Dimensions	See Annex A
6	Material and cross-section characteristics	See Annex A and B
7	Characteristic pull-through resistance of channel back holes at ambient temperatures	No Performance Assessed

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with the European Assessment Document EAD 280016-00-0602, the following legal bases apply:

- In case of intended use a) specified in Section 2:
Commission Decision N° 96/577/EC as amended by Commission Decision 2002/592/EC:
The system is 1
- In case of intended use b) specified in Section 2:
Commission Decision N° 97/161/EC de la Commission:
The system is 2+
- In case of intended use d) specified in Section 2:
Commission Decision N° 1999/472/EC as amended by Commission Decision 2001/596/EC:
The system is 3
- In case of intended use c) specified in Section 2:
Commission Decision N° 1999/472/EC as amended by Commission Decision 2001/596/EC:
The system is 4

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

The technical details necessary for the implementation of the system for the assessment and verification of constancy of performance are laid down in the control plan (confidential part of this European Technical Assessment) deposited at Centre Scientifique et Technique du Bâtiment.

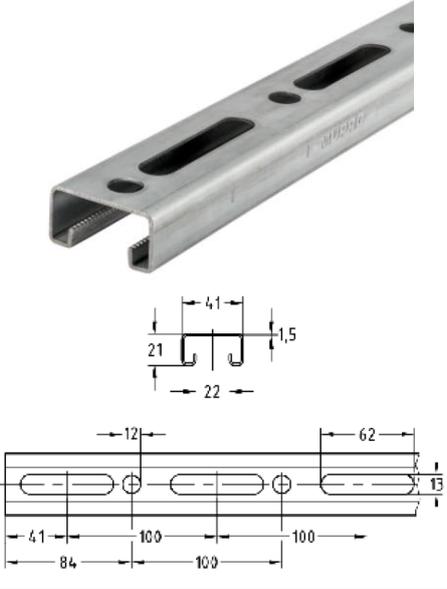

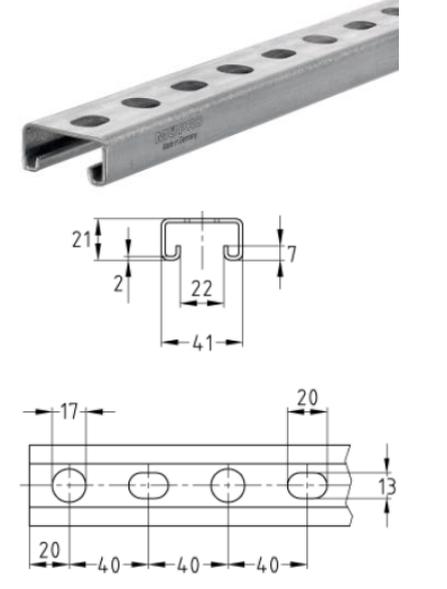

The manufacturer shall, on the basis of a contract, involve a notified body approved in the field of supporting systems for issuing the certificate of conformity CE based on the control plan.

Product description

Shape, dimensions, material and coating

Annex A5

Specifications of intended use

- MÜPRO MPR channels are used to transfer building services components loads such as ducts and equipment for water, heating, cooling, ventilation, electrical and other systems. MÜPRO MPR channels are performing this loadbearing function under conditions described in Section 2 of this European Technical Assessment.
- MÜPRO MPR channels (regardless of length and coating) in the scope of this European Technical Assessment are used for applications at ambient temperature.
