

### MPC-Support channels 27/18 L (light) sendzimir galvanised

#### Field of application

- Ideal for pipe installation as support structure for air ducts in dry interiors
- Variety of mounting options for pre-wall installations and shelves in combination with extensive range of system components

#### Advantages

- Quick and efficient attachment of pipe sections and multiple pipe ways
- Scale marks sideways and on the side with the slot simplify the alignment of the attachment elements during installation and facilitate the measuring and cutting to length of the section on site
- For secure fixing that is adjustable laterally and vertically
- High bending stiffness due to the cross-section design
- For setting up structures with correctly measured static loads by means of diverse connection components
- Suitable vibration control elements for all support channels available
- Clean-cut appearance by the use of MPC-protection caps
