

## VARIO-Bolt joint

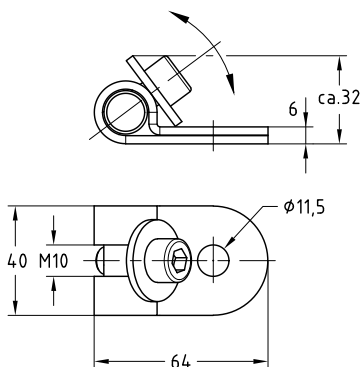

galvanised

## Field of application

- For bracing assembly in combination with support channels
- For stiffening frame constructions
- For brace assembly in combination with pipe clamps

## Advantages

- Continuous adjustable range
- Easy to use - minimal installation effort
- Wide range of possible applications
- Compatibility with existing support channel systems

## Features

Max. admissible tensile load [N]		
0°	45°	90°
4,000	3,000	1,000

Connecting thread M	Part no.	Sales unit	Pack unit
M10	170452	20	pieces

Two nuts needed to counter.
