

Reducing couplings

Field of application

- For the coupling of SML pipe systems according to DIN 19522/ EN 877 with other pipe systems according to DIN 19560 (PE-HD pipes) and DIN 19535 (PP pipes) as well as for use as end caps in pipe systems

Advantages

- The end cap can be easily removed by pulling on the tongue (with pliers, if necessary) – no cutting out of the coupling required, therefore:
 - Time and cost saving
 - No danger of damaging the sealing lip

- Two sealing lips guarantee stable guidance of the pipe
- A wide central fastener allows uniform tightening
- Highly elastic material with a great wall thickness guarantees a long life cycle and permanent connection
- High-stability of coupling due to the large insertion depth
- Can be used with an internal pressure of pipe up to 0.5 bar
- Tested and approved by the Material Testing Institute of North Rhine-Westphalia, supervision contract Nr. 117430
- Approved by building authorities

Features

Nominal SML pipe size [DN]	Pipe outside diameter [mm]	Spanner width [SW]	Part no.	Sales unit	Pack unit
50	58	7	130317	10	pieces
70	78		130318		
80	83		130319		
100	110	130315	20		
125	135	130316	5
